

Yield of wheat.

Key words: Split-plot.

Description

An experiment with 6 varieties of wheat concerning the treatment of a fungus attack was carried out on an experimental field with 5 blocks each consisting of 12 plots. The experimental design and the yield (hkg/ha) for each plot are given in the following table, where the treatment (T=treated, U=untreated) and the variety (an=anja, ci=citadel, ko=kosack, kr=kraka, sl=sleipner, vu=vuka) are also given.

U kr 58.5	U sl 58.6	U ko 59.6	U an 32.8	U ci 57.8	U vu 30.6	T ko 75.2	T sl 74.2	T vu 63.1	T ci 76.4	T an 69.4	T kr 75.6
-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------

U an 30.5	U vu 28.5	U sl 52.0	U kr 54.1	U ko 56.1	U ci 54.4	T ci 79.8	T ko 74.4	T vu 62.2	T sl 76.5	T an 65.4	T kr 64.8
-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------

T kr 64.2	T ko 75.2	T ci 80.1	T an 61.3	T vu 57.9	T sl 78.2	U vu 27.1	U kr 55.0	U an 31.4	U ko 62.7	U ci 60.1	U sl 59.5
-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------

U an 26.7	U sl 54.9	U kr 47.9	U ci 54.7	U vu 24.4	U ko 53.8	T vu 57.3	T ko 57.3	T ci 77.2	T kr 84.4	T an 62.7	T sl 58.9

T an 61.9	T sl 80.2	T ko 73.3	T ci 77.5	T vu 63.1	T kr 62.1	U ci 53.2	U vu 25.9	U sl 60.6	U ko 60.4	U kr 52.9	U an 31.1
-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------	-----------------

Number of observations: 60

Variable	Description
block	Numbered 1-5
treat	Values U, T
variety	Values an, ci, ko, kr, sl, vu
yield	Measured in hkg/ha

Source

The Royal Veterinary and Agricultural University, Denmark.

Analysis

Split-plot with blocks.
