

Data sets available for ST113: Mixed Linear Models

Introduction, Randomized Blocks Design

NIR prediction of HPLC measurements, complete data

NIR prediction of HPLC measurements, missing data

Sensory evaluation of cookies

General factor structure

Drying of beech wood planks

Maillard reaction in milk powder

Maillard reaction in milk powder, version II

Colour of spinage

Rooting of Hibiscus

Desease in cucumbers

Tractor comparison

Sensory evaluation of spinage

Hierarchial

Lactase in piglets

Fructification of blueberries

Split-plot

Effect of nitrogen fertilizer on yield of oats

Tenderness of pork-meat

Rancidness of steaks

Yield of wheat

Analysis of covariance

Hormone treatment of steers

Concentration of a hormone in cattle

BIB example with different slopes
Growth of trees.

Random coefficient analysis

Constructed data
Consumer preference mapping of carrots

Repeated measures

Enrofloxacin treatments of pigs
Histamine response in dogs
PH in pigs
Activity of rats
Growth of guinea pigs
