

Tractor comparison

Key words: Factor structure.

Description

In a comparison of two tractors, five drivers used each of the tractors to plough a field of a certain size. The time in minutes was recorded. This was repeated on three different days (with the same drivers and tractors).

Number of observations: 30

Variable	Description
day	Numbered 1,2,3
tractor	Numbered 1,2
driver	Values a,b,c,d,e,f
time	Ploughing time
