Eikonal Fields for Refractive Novel-View Synthesis (supplementary material)

Mojtaba Bemana
MPI Informatik

Karol Myszkowski
MPI Informatik

Jeppe Revall Frisvad
Technical University of Denmark

Hans-Peter Seidel
MPI Informatik

Tobias Ritschel
University College London

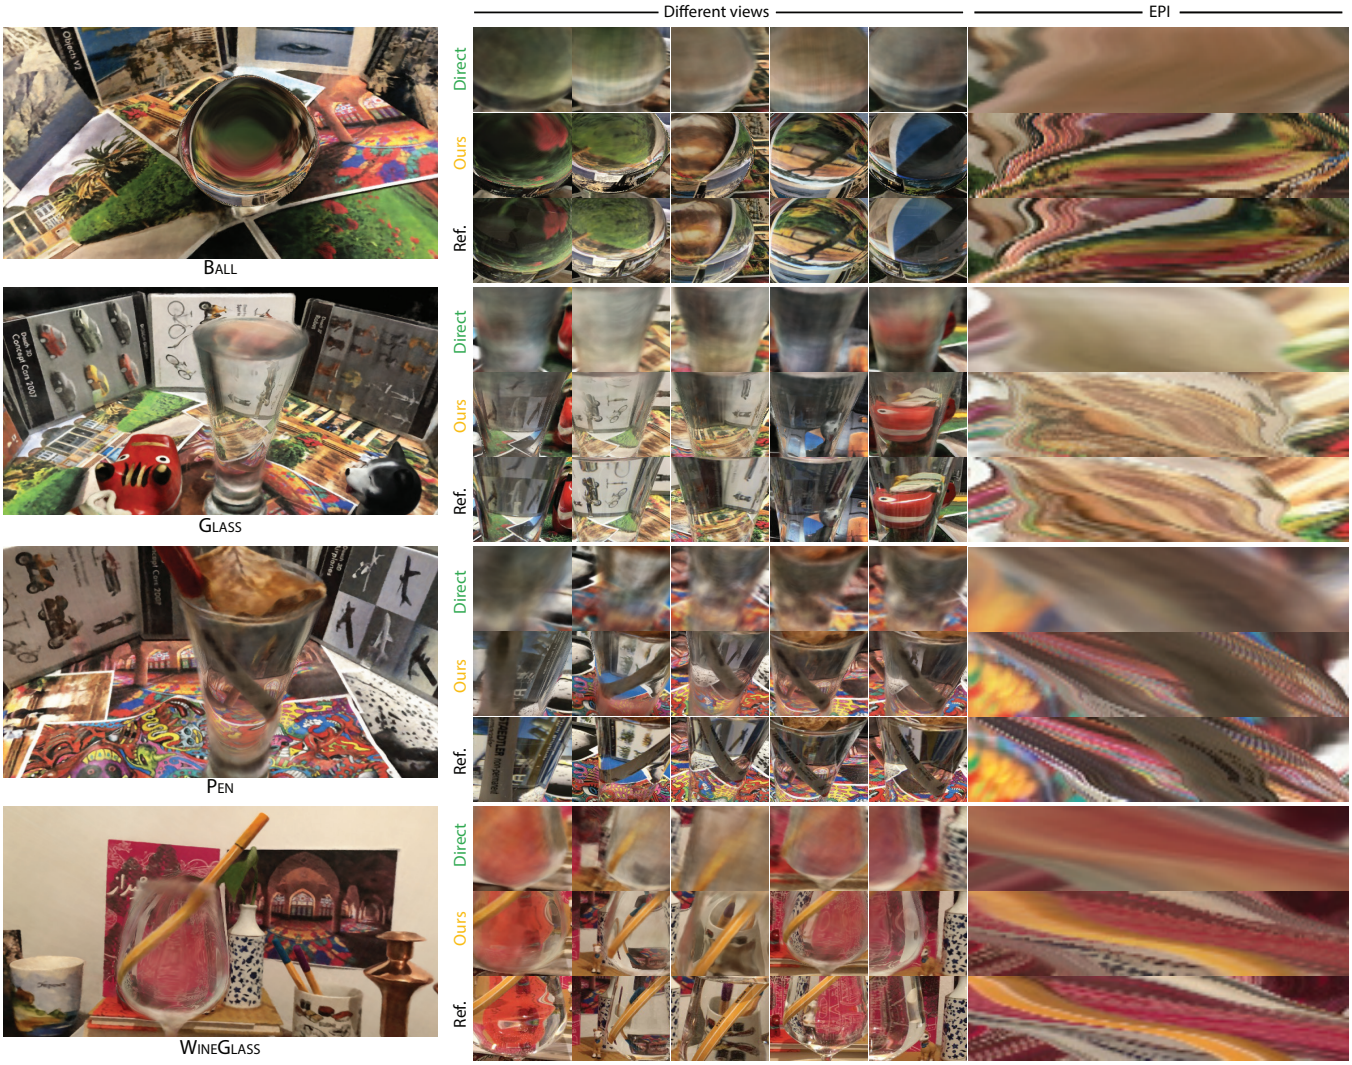

Figure 1: The left block shows the reconstructed test views using our method for four different scenes. The middle block shows insets taken from novel views produced by `Direct` and `Ours` (rows) for different view points (columns). The right block shows a pseudo-epipolar view using a continuous camera trajectory, again for each method.
