- S.1 IR TOOLS. A Matlab package of iterative regularization methods and test problems for large-scale linear inverse problems. The software is submitted to Numerical Algorithms (see ref. 2 above) and will be available from Netlib. It can be viewed as a state-of-the-art version of REGULARIZATION TOOLS, and the new 2D test problems complement the outdated 1D problems from that package.
- S.2 AIR TOOLS II. A Matlab package of algebraic iterative reconstruction methods. The software is published in Numerical Algorithms (see ref. 8 above) and is available from Netlib in the directory `numeralgo/na47`. It is an improved and expanded version of the code published in J. Comput. Appl. Math. (see ref. 29 above).
- S.3 TVREG. Software for Total Variation Regularization. The accompanying paper is published in BIT (see ref. 27 above), and the software is available from `www.imm.dtu.dk/~pch/TVReg`.
