

CURRICULUM VITAE FOR PER CHRISTIAN HANSEN

Professor Per Christian Hansen has worked with numerical regularization algorithms for 30 years, and he has published 4 books and 100+ papers in leading journals. He has developed a number of software packages, of which REGULARIZATION TOOLS (now in its 4th version) is a popular toolbox for analysis and solution of discrete inverse problems. His current research projects involve algorithms for tomographic reconstruction and iterative image deblurring algorithms. His H-INDEX is 45 and he is a SIAM fellow.
