

# Talk

By

Associate Professor Klaus Grue (DIKU)

Wednesday 17 January 2007 14:00-15:00

IMM-DTU Building 322/033

## Logiweb

Logiweb is a system for web-publication of notices, scientific papers, and entire books which contain executable programs, axiomatic systems, machine verified proofs and the like.

The talk gives an introduction to Logiweb and gives a walk-through of its on-line tutorial (<http://logiweb.eu/>). Logiweb is funnier to play with than to listen about, so bring your internet enabled portable, write your own Logiwiki contributions during the talk, get your programs run, and get your proofs verified.

**Host: Jørgen Villadsen**
